UNLEASH would not be possible without the early support and commitment from the very first founding formation of 15 donors, shown below. By taking the first step as catalytic investors, they all play a critical role in building UNLEASH as a global visionary initiative. This not only confirms each of these foundations’ commitment to the first UNLEASH event in Denmark, but also to promoting global sustainable development and fostering young global leaders of tomorrow. We are sincerely grateful for the trust and partnership with these foundations along with our other strategic partners that all together enabled UNLEASH as global innovation lab for the Sustainable Development Goals.
